

## Utility Design Services for Industrial Processes

Global Cynax provides utility room design services tailored to power, boiler, air compressor & co-generation systems for various manufacturing industries. Our team is highly skilled, with many members possessing both domestic & international experience, along with an extensive portfolio of successful projects.

### Detailed Piping and P&ID Solutions

We design Piping and P&ID solutions for industrial facilities, ensuring safety and efficiency with comprehensive layouts and adherence to top standards.

### Utility Room Design

Global Cynax provides utility room design services for power, steam boiler, air compression & co-generation plant of manufacturing industry.

### Equipment Sizing & System Calculations

At Global Cynax, we prioritize precision in equipment sizing and system design for industrial processes. Our experts use advanced techniques to ensure optimal performance and efficiency, minimizing waste.

### Value Added Services

- ✓ Integration of Renewable Energy Sources
- ✓ Energy Audit and Optimization
- ✓ Maintenance and Performance Monitoring
